

What does a sea star see?  
Can it watch the birds in a tree?  
Does it look past the waves,  
Past the beach and the caves?  
Does it wish it could fly like a bee?  
  
Does a sea star have dreams that are grand?  
Would it rather just lay in the sand?  
  
If it turns its eyes from the place it resides,  
Does a sea star see stars  
Or only sea tides?

**Color this page and draw something in the sky for the sea star to see.**
